PACS – Picture Archiving and Communication System

ambicotec
ambient communication technologies

The screenshot displays the PACS software interface. At the top, a toolbar contains various icons for navigation and image manipulation. Below the toolbar, a header bar shows patient information: ID: 100666894, Name: Multi Study, Geschlecht: M, Geburtsdatum: 29.03.1950. The main workspace is divided into several panels. On the left, a 'Studien: 2' sidebar lists study details, including dates, times, and image sequences (e.g., '16.08.2005 17:51:01 CR,PR 4', 'SE #122491 IM: 1'). The central area features six image windows. The top row shows three views of a shoulder X-ray. The bottom row shows two views of a chest X-ray (TSPINE) and one view of a lateral chest X-ray. Each image window has its own toolbar and a '1\1' indicator. A large grey rectangular area is present in the bottom right corner of the main workspace. The bottom status bar displays 'Version: 5.6.1.17' on the left and '16.11.2009 20:38' on the right.
